## In the Claims:

In compliance with the guidelines for making amendments, Applicants present all pending claims with status indicators.

Claim 1 is pending.

(Previously presented) A disposable waterproof sheath to cover an inner portion 1. of a footbath or handbath in order to protect an appendage from microbial matter in the inner container, the sheath being a) deep enough so that the appendage can enter the container and b) conforms to the edge of the container so that the sheath adheres to the container edge or grips the container edge and prevents the appendage from contacting the inner portion of the container.

2 to 6. (Canceled)
